

# Dual Bond™

## SHOTGUN SABOT SLUG

No more tradeoffs between expansion diameter, penetration and retained weight! The new Supreme Elite® Dual Bond™ optimizes all three for awesome knockdown and deep penetration to help ensure a clean quick kill.

- 1** Revolutionary “bullet within a bullet” delivers an unprecedented 12 segment design maximizing stopping power.
- 2** Massive hollow point cavity provides lethal stopping performance at a variety of ranges and impact velocities.
- 3** Proprietary bonding process welds lead and inner bullet jacket together—improving retained weight and penetration for quick kills.
- 4** Heavy outer jacket is mechanically bonded to the inner bullet, protecting it during penetration through thick hide and heavy bone, and ensuring maximum retained weight and penetration.
- 5** Revolutionary design delivers unprecedented knockdown and penetration—retaining nearly 100% of the original weight.
- 6** Patented sabot with steel area multiplier provides consistent sabot separation for improved accuracy.

Designed for game from whitetail deer to large dangerous North American game such as brown bear.
